SUMMARY

A software engineer with a passion for problem-solving, learning new concepts, and creating innovative new projects. Before starting my journey as a Full-Stack Developer, I was a Server/Bartender where I loved to work together with a team to come up with cool creations for people to enjoy. Once I discovered I could put these skills together and build awesome new things, I fell in love with programming and the world of tech as a whole. Because of my experience, I have the ability to deliver high quality outcomes due to being a hard-worker with a curious mindset.

SKILLS

- HTML5, CSS3, JavaScript, Node.js, Express.js, PostgreSQL, Sequelize, Git, Github, RESTful API's, JSON, ES6 Templating

EDUCATION

DigitalCrafts   **September, 2022**
Certificate in Software Engineering   *San Diego, CA*
- Software engineering training program covering full-stack development including, but not limited to HTML5, CSS3, JavaScript, including an emphasis on cutting-edge frameworks like React/Redux and server-side technologies including Node.js, Express.js, Sequelize, and PostgreSQL

SOFTWARE DEVELOPMENT PORTFOLIO

Personal Developer Portfolio | https://jakeservin.dev | https://github.com/jakeservin/portfolio   **July 2022**
- Allows users to learn more about me and my skills. A contact form allows the user to contact me via email from the webpage.
- Responsible for entirety of project. Ensuring responsive design and simple but innovative layout using Bootstrap.
- Built with: HTML, CSS, JavaScript, Bootstrap

Wordle Clone | https://jakeservin.github.io/wordle-clone |https://github.com/jakeservin/wordle-clone   **May 2022**
- A project that mimics the functionality of the popular game, but allows you to play as much as you want.
- Responsible for entirety of project. Came up with unique logic to track user input, test word against a dictionary api, and update the display accordingly.
- Built with: HTML, CSS, JavaScript

BarJournal| https://jakeservin.github.io/drinkdb |https://github.com/jakeservin/drinkdb   **June 2022**
- Cocktail social media app allows users to discover new cocktail recipes or post their own.
- Full-stack project. Responsible for entirety of project.
- Built with: HTML, CSS, JavaScript, Node.js, Express.js, PostgreSQL, Sequelize, Heroku, ES6 Template Engine

WORK EXPERIENCE

Temecula Valley Winery Management   **Feb 2019 – Present**
Manager & Bartender   *Temecula, CA*
- Asked customer for feedback and solved problems efficiently.
- Helped developed strategies to increase business revenue, customer satisfaction, and employee production.
- Quickly and efficiently solved problems that arose in a high-volume and high-stress environment.
- Developed new signature cocktails to support bar marketing brand and increase profits.
